

SUPERTYFON® AT 150/130 with Valve Unit TV 784

A high-power whistle according to IMO
for vessels of 75 - 200 m in length.

Valve Unit TV 784
Ref. no. 24510043

Supertyfon AT 150/130
Ref. no. 24800641

General Information

Before "COLREG 1972" (the International Regulations for Preventing Collisions at Sea), a popular practice was to use low-pitched tones even for smaller vessels. In other words, the principle of a low tone for large vessels was not followed with sufficient stringency.

According to the IMO regulations, the very low tones are strictly reserved for the largest ships. For middle-sized and smaller vessels, there are rather wide limits as to the choice of frequencies. Preference has been given to signals which, even at some distance, have capability to be heard.

For vessels of 75 - 200 m, whistles with frequencies between 130 and 350 Hz are desired.

Positioning Whistles

For an all-round radiation and a limited noise level from the ship's whistles at the listening posts, the positioning of the ship's whistles is very important. For further information regarding installation regulations and "Combined Systems", see our leaflet "IMO Regulations, KSM 265E".

Valve Unit

The VALVE UNIT TV 784 has a good air flow section, thermostatic heating, exchangeable choke flanges and filters. The apparatus is fitted with two coils for normal and emergency operation and lanyard as standard (see separate leaflet KSM 264).

Installation

SUPERTYFON® 150/130 is to be fixed with four M12 bolts to an outrigger or similar construction. To avoid functional trouble blow the supply pipe thoroughly clean before connecting to the signalling whistle. If the pipe line above deck is longer than 100 m, a primary FILTER TP 15/2 should be installed at the foot of the mast to protect the signalling apparatus from water condensate and rust particles. This filter is recommended to be drained regularly, approximately once a month.

Technical Data

Frequency: 130 Hz

Sound Pressure Level (1m):

Total: 148 dB

1/3 octave IMO limit: 138 dB

Air consumption: 35 - 45 l/s

Air supply pressure with choke regulation:
0,6 - 3 MPa (6 - 30 bar)

Electric power:

Thermostat heating: 24 W

Valve: 27 W

Weight: 25 kg

For wiring diagram: see Valve Unit TV 784, KSM 264

AT 150/130: Spare Parts and Dimensions

Spare Parts AT 150/130			
No.	Name	Material	Ref. No
1	Horn AT 150/130	Cast Iron / Glass fibre armed polyester	21801092
2	Screw M6S 8 x 25	Stainl. steel	20801123
3	Diaphragm KM 150 AT compl. with O-rings	Titan / Nitrile rubber	21758006
4	Housing 150 AT	Brass	21754100
5	Packing 80 x 39 x 1	Nitrile rubber	37710278
9	Packing 62 x 62 x 1	Nitrile rubber	21765037
10	Choke flange (state pressure)	Brass	21768201
11	Filter	Brass	32170418
12	Bracket	Steel galv.	21901094
13	Packing 120/36 x 1	Nitrile rubber	37710245

Spare parts can be obtained from Kockum Sonics or their agents. When ordering, please, give working pressure, reference number and part name. Spare parts for valve unit, see Valve Unit TV 784, KSM 264.

Pipe line dimensions		
Working pressure MPa (overpressure)	Length of pipe metres	Inside diam. of pipe, mm
below 2.0	Max. 150	Min. 28*
	150 - 350	Min. 35*
above 2.0	Max. 150	Min. 25*
	150 - 350	Min. 28*

*Converting muff necessary for connection to signal apparatus

Air Pressure Choking

The basic condition for good performance and reliable function is the appropriate air pressure activating the diaphragm.

When ordering, please state the working pressure. If the connection pipe is dimensioned in accordance with the recommendations (see table), the pressure gauge reading at the air receiver in the engine room is adequate for choice of choke.

Subject to alteration without notice.
