

# TRANBERG® LED DECKLIGHT

TEF 2760

For Area Lighting on Vessels

TRANBERG® TEF2760 delivers high light output, combined with simple installation and no maintenance. The LED illumination provides instant-on at any ambient temperature, and is available with built-in battery for up to 3hrs of operation. TEF2760 is

available for several mounting options, and is built in powder-coated stainless steel AISI316L. With one cable plug in each end of the luminaire, it is ready for through-wiring with multiple luminaires connected in parallel.

## Application

- Watertight luminaire for harsh marine applications, such as open decks, engine rooms, holds, storage yards, working spaces, and open areas.

## Features and benefits

- Versatile light fixture for a wide range of marine applications.
- Economic luminaire with high light output.
- Designed and manufactured for marine requirements.
- Housing in AISI 316L for outdoor applications.
- Powder coated for easy maintenance and cleaning
- Multiple mounting options available: Bolt-on (H), sideways mounting (W), and end mounting brackets (WD).
- High color retention
- 3 hr battery backup available.
- Low weight and installation friendly

## Approvals and certificates

CE

Technical Data	
Material:	Stainless steel powder coated white, Polycarbonate diffuser
Input voltage:	220-240V AC
Power consumption:	22W / 44W
Operating temperature:	-25°C to +45°C 0°C to +45°C when on battery backup power
Light Source:	LED
Light output:	3400lm / 6800lm
Color temperature:	4000K
CRI:	>80
Lifetime:	100,000 hrs / L70 at Ta45°C (driver)
Ingress protection:	IP66/67
Weight:	3,9 kg / 6,1 kg
Mounting:	Several mounting options available
Cable entries:	One M20 plastic cable gland in each end (cable Ø 6-12mm)
