

**PROPOSAL**  
**PRINCIPLE BLOCK DIAGRAM FOR WHISTLE SYSTEM**  
**"SAFE RETURN TO PORT"**

SW1.  
 If SW2 is ON by mistake this can be over-rided by SW1 that turns off the supply to RE2-4. To be mounted close to TLG2000 on nav bridge.

All external relays Re1 – Re4 are shown in non-energized position.  
 Coil supply to be defined later.

SW1-2 Kockum Sonics supply

Also read TLG2000 manual for complement connections.

SW2.  
 Change over switch controls if "nav bridge" or "emerg bridge" control unit is to be selected.
